

MUST-KNOW GLOSSARY

20 AI TERMS EVERY PM MUST KNOW

Plain-English definitions, one idea per slide — swipe through and save it.

Sachin Sharma
AI Powered PM Coach

SWIPE →

LLM

Models that understand language and generate useful responses.

Language in, useful language out

PROMPT ENGINEERING

Better instructions produce clearer, safer, more useful outputs.

VAGUE PROMPT

"Write about AI"

Generic output

Endless rework

ENGINEERED PROMPT

**Role, context,
format**

Precise output

Ship-ready draft

RAG

Connect models with trusted data for accurate answers.

EMBEDDINGS

Turn meaning into numbers for similarity matching.

Close in meaning = close in space

VECTOR DATABASE

Store embeddings for fast search and recommendations.

FINE-TUNING

Teach models domain patterns using specialized training data.

CONTEXT WINDOW

How much info models can consider at once.

Bigger window = more context held in one conversation

HALLUCINATION

Confident AI answers can still be completely wrong.

Fluency is not accuracy — always verify

AI AGENT

Plans tasks, uses tools, and takes autonomous actions.

MCP

Connects AI models with tools, systems, and data.

TOKEN

Small text units affecting cost, limits, and speed.

Text is split into tokens

Tokens are counted

Cost and limits follow

So does response speed

LATENCY

Response delay shapes product experience and engagement.

Every extra second costs engagement

TEMPERATURE

Controls whether outputs feel precise or creative.

Low 0.2

Mid 0.7

High 1.0

Low for precision · high for exploration

GROUNDING

Anchors AI responses in trusted source information.

GUARDRAILS

Boundaries preventing harmful or unwanted outputs.

Block harmful output

Filter sensitive data

Enforce policy limits

Safe fallbacks

EVALUATION

Measure AI quality before users discover problems.

INFERENCE

Turns trained models into real-time product outputs.

MULTIMODAL AI

Understands text, images, audio and video.

Text

Images

Audio

Video

One model, many kinds of input

FUNCTION CALLING

Lets models trigger APIs and complete actions.

KNOWLEDGE BASE

Trusted company info powering accurate AI answers.
